

CONFIDENTIAL

THE BRISTOL ROYAL INFIRMARY INQUIRY
REVIEW OF CLINICAL RECORDS

COVER NOTE

Please complete all sections

<p>Child's Initials: [REDACTED] D.O.B: [REDACTED] 89</p> <p>BRI number: [REDACTED]</p> <p>BRHSC number: [REDACTED]</p>	<p>Diagnosis: Ventricular Septal Defect. Patent foramen ovale. Pulmonary hypertension.</p>	<p>Overall Outcome: Alive</p>
--	---	--

Additional Comments:

Protracted procedure times, but no apparent surgical difficulties and a good result.

Overall grade for adequacy of care: 4

Date of Review: 05.08.99

Team No: [REDACTED]

Number of notes attached:
(a) pre operative care - 1
(b) surgical and post operative care - 1

Signed Team Co-ordinator

Please use the following summary scores for adequacy:

Overall adequacy of care and relevance to outcome:

- 4 = Adequate
- 3 = Less than adequate care but different management would have made no difference to outcome.
- 2 = Less than adequate care - different management MIGHT have made a difference to outcome (i.e. avoidable factor of uncertain influence on outcome).
- 1 = Less than adequate care in which different management would reasonably be expected to have made a difference to outcome (i.e. an avoidable factor which probably contributed to death or disability)
- X = Insufficient information for comment

Completed returns to: Claire Bache, Bristol Royal Infirmary Inquiry, 2-10 Temple Way, Bristol, BS2 0BY

Child's Initials: [REDACTED] D.O.B: [REDACTED] 89

Date of Procedure: [REDACTED] 06.89

Aspects of Care:	Adequacy of Care: 4, 3, 2, 1, or X	Comments – especially relevance of less than adequate care to outcome:	Specialty: GP, Cardiologist, Surgeon, Anaesthetist/Intensivist, Nursing, Technical, Pathologist,
Timing and appropriateness of initial referral/condition on arrival	4		
Clinical assessment and management	4		RPM
Accuracy and completeness of diagnosis	4		RPM/HSJ
Appropriateness of initial treatment strategy	4		RPM/JPD
Timing of planned treatment	4		RPM/JPD
Immediate pre-operative management incl. nursing	4		Russell/Pratt Hosegood/Woodhall Riddell/Whittle etc.

Please use the following summary scores for adequacy:

Overall adequacy of care and relevance to outcome:

- 4 = Adequate
- 3 = Less than adequate care but different management would have made no difference to outcome.
- 2 = Less than adequate care – different management MIGHT have made a difference to outcome (i.e. avoidable factor of uncertain influence on outcome).
- 1 = Less than adequate care in which different management would reasonably be expected to have made a difference to outcome (i.e. an avoidable factor which probably contributed to death or disability)
- X = Insufficient information for comment.
