(clinic 20.1.93)

Dear Steve & Hyam

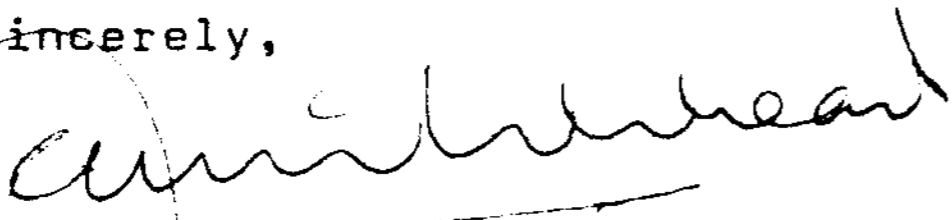

Mia PARSONS, d.o.b. 19.5.92

Thank you for asking me to see Mia whom we discussed in the joint meeting a few weeks ago. She has Down's syndrome and atrio-ventricular septal defect, bilateral SVCs and a bad right subclavian artery and mild hypoplasia of the aortic isthmus. I have advised the parents that total correction should be undertaken and we had the usual discussion of the potential risks and benefits involved.

They have accepted this advice and her name has been placed on the waiting list with the intention that her operation will be carried out in March or April.

With kind regards

Yours sincerely,

J. D. WISHEART  
Consultant Cardiothoracic Surgeon

c.c. Dr. D.Evans, Cons. Paed. Morriston Hospital, Swansea.
