30. Clinician % overall responsibility for Picu @ BRHSC Peter Fleming ? Date - ? 1985 ->
32. I cannot recall exact establishment having destroyed any document I had at home. There were times when vacancies were blocked by management. I would discuss this with B. Sherriff.
67. I have no records of establishment of skill mix figures. During my time on the unit there were 2 or 3 skill mix exercises undertaken by R.H.A. We did not always agree with the results and would alert the establishment within the allocated budget. This was discussed at unit CoM meetings & with N. Manager - Julie Crowley or Barbara Sherriff.
72. Children on Picu were reviewed at least twice daily by paed. anaesth. & cardio-  
logist & at least daily by the CT Surgeon.  
The Intensivist (Neonatologist P. Fleming) was also available on daily rounds, and at other times if it was felt his input was of value.

81. For a while during late '80 early '90  
some staff from the BRI cardiac ICU  
spent time on PICU BRHSC. Unfortunately  
this stopped because of staff shortages.
