Date of Procedure:

Aspects of Care:	Adequacy of Care: 4, 3, 2, 1, or X	Comments – especially relevance of less than adequate care to outcome:	Specialty: GP, Cardiologist, Surgeon, Anaesthetist/Intensivist, Nursing, Technical, Pathologist,
Timing and appropriateness of initial referral/ condition on arrival			
Clinical assessment and management			
Accuracy and completeness of diagnosis			
Appropriateness of initial treatment strategy			
Timing of planned treatment			
Immediate pre-operative management incl. nursing			

A B C D E F

Please use the following summary scores for adequacy:

Overall adequacy of care and relevance to outcome:

4 = Adequate

3 = Less than adequate care but different management would have made no difference to outcome.

2 = Less than adequate care – different management MIGHT have made a difference to outcome (i.e. avoidable factor of uncertain influence on outcome).

1 = Less than adequate care in which different management would reasonably be expected to have made a difference to outcome (i.e. an avoidable factor which probably contributed to death or disability)

X = Insufficient information for comment.
