Dear Jem

Re: Retention of Post Mortem Tissue

Thank you for your letter of August 6th which suggests that we should be a little more rigorous in stating that we have received the permission of the parents to retain part of the heart. I was slightly suprised to receive this advice as I had been recently told by Dr Sheffield that this problem had eased a little under the jurisdiction of the new coroner. I would be grateful therefore if you would simply confirm your advice and of course we can discuss it the next time we meet. Thanks for your letter.

With best wishes

Yours sincerely

James D Wisheart  
Cardiothoracic Surgeon
